We also provide Past papers for Mids. and Finals

Cross Check your answers before submitting directly from the file. We are not responsible for 100% correction as human error exists

1. Question: A----- alters the execution sequence of the program

Options:

- a) Modulus
- b) Assignment statement
- c) Division
- d) Control statement

Correct option: d) Control statement

2. Question: The statement $z=x+y$ shows

Options:

- a) The sum of x and z be assigned to the variable y
- b) The sum of X and Y be assigned to the variable Z
- c) The Y be assigned to the variable Z
- d) The X and Y be assigned to the variable Z

Correct option: b) The sum of X and Y be assigned to the variable Z

3. Question: Software Engineering is an engineering discipline that is concerned with:

Options:

- a) All aspects of computer-based systems development, including hardware, software, and process engineering
- b) Theories and methods that underlie computers and software systems

- c) How computer systems work
- d) All aspects of software production

Correct option: a) All aspects of computer-based systems development, including hardware, software, and process engineering

4. Question: In the case of the incremental model, these prototypes evolve into the complete, final system, a process known as _____.

Options:

- a) Evolutionary prototyping
- b) Throwaway prototyping
- c) Agile method
- d) Rapid prototyping

Correct option: a) Evolutionary prototyping

5. Question: In modern computer applications, problems are more easily solved in the context of:

Options:

- a) Traditional context
- b) Technology
- c) Parallel processing
- d) Traditional processing

Correct option: c) Parallel processing

6. Question: Which of the following languages is related to Object-Oriented Paradigm?

Options:

- a) Smalltalk

- b) Prolog
- c) LISP
- d) Smalltalk

Correct option: d) Smalltalk

7. Question: _____ is the field of engineering that deals with designing system interfaces by considering human mental abilities.

Options:

- a) Thermodynamics
- b) Genetics
- c) Ergonomics
- d) Cognetics

Correct option: c) Ergonomics

8. Question: A process used by the software industry to design, develop, and test high-quality software is known as:

Options:

- a) Software testing process
- b) Development manual
- c) Software life cycle
- d) Software Development Life Cycle (SDLC)

Correct option: d) Software Development Life Cycle (SDLC)

9. Question: The second phase of the development phase of the Software Development Life Cycle (SDLC) is:

Options:
