**Past Papers for Mids./Finals are also Available**

**Question # 1:** The SaaS deployments are complemented by \_\_\_\_\_.

- APIs ✓
  - Frameworks
  - Database
  - Class libraries
- 

**Question # 2:** Each VM can have \_\_\_\_\_ Cloudlets scheduled over it.

- 6
  - Multiple ✓
  - 2
  - 5
- 

**Question # 3:** \_\_\_\_\_ is used to tune up performance bottlenecks in the Cloud services before deploying on actual Cloud.

- Private cloud
  - Hybrid cloud
  - CloudSim ✓
  - Public cloud
- 

**Question # 4:** \_\_\_\_\_ emulates a virtualized data center environment.

- Private cloud
- Hybrid cloud

- CloudSim ✓
  - Public cloud
- 

**Question # 5:** The broker searches for the \_\_\_\_\_ options of Cloud providers for the consumer.

- Permanent
  - Best ✓
  - Temporary
  - Costly
- 

**Question # 6:** Bare-metal provisioning is also provided to the consumers with \_\_\_\_\_ access.

- Restrictive
  - User level
  - Limit
  - Administrative ✓
- 

**Question # 7:** The two basic IT resources of IaaS are:

- None of given
  - OS and compiler
  - Interpreter and compiler
  - VMs and Cloud storage ✓
- 

**Question # 8:** PaaS instances are hired by \_\_\_\_\_.

- Amazon Web Services
  - Editing software user
  - Developers ✓
  - 365 software user
- 

**Question # 9:** Non-disruptive service relocation architecture and failover systems are utilized to ensure \_\_\_\_\_ in PaaS instances.

- Integrity
  - Encryption
  - Reliability ✓
  - Consistency
- 

**Question # 10:** \_\_\_\_\_ is used to ensure high availability and forming a failover system.

- Replication ✓
- Encryption
- Consistency
- Integrity

1. Due to the unconfirmed reliability of Cloud subsystems, the use of Cloud for deployment of the -----  
----- critical software is discouraged.

Options:

- A) System
- B) Application
- C) Safety
- D) Space

Correct Option: B) Application

2. Consumers should ----- the performance scores of an application before deploying it to Cloud  
in terms of responsiveness and performance regarding the input/output of bulk data.

Options:

- A) Check
- B) Standardize
- C) Compare
- D) Benchmark

Correct Option: D) Benchmark

3. The template ----- can contain the plan overview, goals and objectives, types of events covered, risk analysis and the mitigation techniques for each type of risk identified.

Options:

- A) Disk recovery program
- B) Project management
- C) Disaster recovery plan
- D) Risk management

Correct Option: C) Disaster recovery plan

4. While designing the cloud-based solution, you will have to consider the functional as well as the ----- requirements.

Options:

- A) Non-procedural
- B) Technological
- C) Non-functional
- D) Non procedural

Correct Option: C) Non-functional

5. Public clouds have unreliable response time; therefore, the consumers should avoid using the Cloud for the deployment of -----critical software.

Options:

- A) System
- B) Application
- C) Space
- D) Time

Correct Option: D) Time

6. Design consideration for the Cloud-based solution should contain considerations for power-efficient design to reduce the environmental effect of the carbon footprint of the Cloud-based solution. This computing is called \_\_\_\_\_.

Options:

- A) Server-less
- B) Grid
- C) Fog
- D) Green

Correct Option: D) Green

7. Consumers should use checksum and replication technique to ensure ----- to detect any violations of it.

Options:

- A) Data integrity
- B) Data regulation
- C) Data recovery
- D) Data separation

Correct Option: A) Data integrity

8. In -----, the consumer should determine that the provider has implemented necessary procedures and controls to fulfil various legal, ISO and audit standards required as a provider and/or for the consumer to fulfill.

Options:

- A) Administration
- B) Licensing
- C) Compliance
- D) Continuity of Operations

Correct Option: C) Compliance

9. Regarding the IT governance requirements, the following is an important point.

Options:

- A) High and low demand periods in terms of time
- B) Average simultaneous users

C) RAM Usage

D) Describe the access control policies for various users

Correct Option: B) Average simultaneous users

10. In cloud solution design matrix, ----- identify the uptime requirements of the cloud application.

Options:

A) Availability

B) Backup

C) Accessibility

D) Audit

Correct Option: A) Availability
