

Question # 1 of 10 (Start time: 03:42:15 PM, 29 January 2021)

Total Marks: 1

The _____ can be determined from the number of platters and the number of tracks.

Select the correct option

<input type="radio"/>	Speed of processing	//
<input type="radio"/>	execution time	//
<input checked="" type="radio"/>	storage capacity	
<input type="radio"/>	Latency

Question # 3 of 10 (Start time: 03:43:55 PM, 29 January 2021)

Total Marks: 1

_____ is an electrical pathway through which the processor communicates with the internal and external devices attached to the computer.

Select the correct option

<input checked="" type="radio"/>	Computer Bus	//
<input type="radio"/>	Hazard	//
<input type="radio"/>	Memory	//
<input type="radio"/>	Disk	//

Question # 6 of 10 (Start time: 03:46:14 PM, 29 January 2021)

Total Marks: 1

Identify the type of serial communication error condition in which "0" is received instead of a stop bit (which is always a "1")?

Select the correct option

<input type="radio"/>	Framing error	//
<input type="radio"/>	Parity error	//
<input checked="" type="radio"/>	Overrun error	//
<input type="radio"/>	Under-run error	//

Question # 10 of 10 (Start time: 03:47:58 PM, 29 January 2021)

Total Marks: 1

_____ means that the CPU should input data from an input device only when the device is ready to provide data and send data to an output device only when it is ready to receive data.

Select the correct option

<input type="radio"/>	Data location	//
<input checked="" type="radio"/>	Data synchronization	//
<input type="radio"/>	Data transfer	
<input type="radio"/>	Asynchronous transmission

Question # 1 of 10 (Start time: 06:53:36 PM, 10 August 2020)

Total Marks: 1

Identify the following type of serial communication error condition in which no character is available at the beginning of an interval.

hadi

Select the correct option

<input type="radio"/>	Framing error
<input type="radio"/>	Parity error
<input checked="" type="radio"/>	Overrun error
<input type="radio"/>	Under-run error

Question # 2 of 10 (Start time: 06:55:01 PM, 10 August 2020)

Total Marks: 1

_____ lets the user execute the program, one instruction at a time.

Select the correct option

- Single Step
- Execute
- Change PC
- List File

Question # 4 of 10 (Start time: 06:57:05 PM, 10 August 2020)

Total Marks: 1

When an I/O module has a capability of executing a specific set of instructions for specific I/O devices in the memory without the involvement of CPU is called _____.

Select the correct option

- | | | |
|----------------------------------|------------------|--|
| <input type="radio"/> | Selector Channel | |
| <input checked="" type="radio"/> | I/O Channel | |
| <input type="radio"/> | I/O processors | |
| <input type="radio"/> | Cycle Stealing | |

Question # 5 of 10 (Start time: 06:57:41 PM, 10 August 2020)

Total Marks: 1

Most parallel I/O ports used with peripheral devices are mapped on a range of _____.

Select the correct option

<input type="radio"/>	Bus addresses	//
<input type="radio"/>	Direct memory Access	//
<input checked="" type="radio"/>	contiguous addresses	//
<input type="radio"/>	Cache	//

hadi

Question # 7 of 10 (Start time: 06:59:51 PM, 10 August 2020)

Total Marks: 1

In _____, a separate address space of the CPU is reserved for I/O operations.

Select the correct option

<input checked="" type="radio"/>	Isolated I/O	//
<input type="radio"/>	Memory Mapped I/O	//
<input type="radio"/>	All of above	//
<input type="radio"/>	None of above	//

Question # 9 of 10 (Start time: 07:01:57 PM, 10 August 2020)

Total Marks: 1

Identify the following type of serial communication error condition:
"The prior character that was received was not still read by the CPU and is over written by a new received character."

Select the correct option

<input type="radio"/>	Framing error	hadi	//
<input type="radio"/>	Parity error		//
<input checked="" type="radio"/>	Overrun error		//
<input type="radio"/>	Under-run error		//

Question # 5 of 10 (Start time: 03:45:14 PM, 29 January 2021)

Total Marks: 1

Which one of the following is NOT a technique used when the CPU wants to exchange data with a peripheral device?

Select the correct option

<input type="radio"/>	Direct Memory Access (DMA)	//
<input type="radio"/>	Interrupt driven I/O	//
<input type="radio"/>	Programmed I/O	
<input checked="" type="radio"/>	Virtual Memory
