----- identifies the application program that sent the data.

Select the correct option

- Destination Port
- Source port
- None of the given
- Logical address

TCP uses ----- format for all messages.

Select the correct option

- multiple
- None of the given
- single
- double

Autonomous System chooses a routing protocol to exchange routing information which is passed before being summarized to another group.

Select the correct option

<input checked="" type="radio"/>	True
<input type="radio"/>	False

Question # 7 of 10 (Start time: 03:31:15 PM, 24 July 2023) Total Marks: 1

Autonomous System chooses a routing protocol to exchange routing information which is passed before being summarized to another group.

Select the correct option

<input checked="" type="radio"/>	True
<input type="radio"/>	False

----- includes a 32-bits address mask with each address, which allows the address to be classful, classless, or subnetted.

Select the correct option

- None of the given
- BGP
- RIP
- OSPF
