In C++, putc() is used to write a character into a file, and getc() is used to get a character from a file.

In C++, which operator is used while accessing through the pointer to structure?

Select the correct option

=

&

-

->

->

In C++, when accessing files randomly, which function is used to get current pointer position inside a file?

Select the correct option

tellg()

seekp()

seekg()

tellp()

cs201p lab quiz 7 by iqra azhar

seekg()

Which of the following statement is true regarding structures?

Select the correct option

Variables which are part of a structure are called Member Functions

Variables which are part of a structure are called Data Member

sAll data members must have the same data type

The correct statement regarding structures is:

"Variables which are part of a structure are called Data Members."

Which of the following statement is true regarding structures?

Select the correct option

Variables which are part of a structure are called Data Members

Variables which are part of a structure are called Member Functions

All data members must have the same data type

All data members must have the same memory space

The correct statement regarding structures is:

"Variables which are part of a structure are called Data Members."

Functions seekg () and seekp () require an argument of type ____ to let them know how many bytes to move forward or backward.

Select the correct option

Float

Int

Double
