

total questions:26

mcqs mostly from eagle eye file

1. intra component linkage k about pucha tha 2 marks
 2. abstraction n encapsulation ki defination 2 marks
 3. identify krna tha paragraph sy k peter method of object may tangible aur user kon sy hy 3 marks
 4. functional or non functional requirement btani thi paragraph dia tha 3 marks
 5. as software developer of abc company objects define krny thy 5 marks
 6. case model digram bnani thi
- over all easy tha paper

yar paper asan tha obj few frm past paper pr asan se the i prefer ke ap last 16 se 22 chapter ghol kr pe lo 70 per paper krloge

define coupling?2

what is collaboration ?2

aik sawal me 3 option the pocha tha ke is me external architecture konsa hai

2 question the object die the aik me pocha tha ke cat or aik or word tha ye object kyun kehla he 3 sequence diagram draw krne the client server ko request send krta hai password or id bhejta hai 5 microprocessor object hai is ke 3 chexe dhondne the khd se batane the state

behavior

data 5

-
1. Peter Coad's methodology
 2. Why Ali is considered as an object
 3. If we want to develop object model of a hospital system we need how many classes that will be used in object model of hospital system.
 4. The objects have relationships among them to perform the functionality of the system which types of relationship exist among them.

Past papers mein se kuch nahi aya...

ast papers ma sa kuch nahin tha khas tor pa MCQS sara new tha but easy tha .

subjective ma

cardinality of object ya question tha

container or place ka differance tha

BEry boham ki aik statement the k project agar software architecture ko acheive na kra to us ka according ya sahi ha k nahin

2 object dia hua tha A and B un ka darmian sequance diagram bani the.object A ka msg object B ko pohncha k nahin yes or no is ki diagram the.

aik modularity ka question tha

ya mera aj ka papr tha agar marks lana ha to book paro past paprz ma sa kuch nahin aya tha

my paper:

UML draw karni thi association., inheritance and composition k liye

cat and radio object q hote hai

syncns/asyns messages

destory ka function kis trahan likhna hota hai

software cannot wear out explain

mera cs504 ka paper...ALHAMDULILLAH acha ho gaya hai.questions yeh thy

1: name the two types of structure system (2 marks)

2: write the name of UML notations (2 marks)

3: aik diagram bnai the or unka relationship btana tha k kon sa hai..us me composition, aggregation, or associations ko declare kiya gya tha..so main ny in 3 k names likh diye (5 marks)

4: aik hospital system k liye 5 classes objects k name likhny thy. (5 marks)

5: peter coad methodology me places ki examples likhi hue the or kaha gya tha is category ka name likhen yeh kis ki examples hen (3 marks)

6: peter coad methodology k mutabiq scenario bnaya tha aik sales system ka or us ki services or attributes likhny thy (3 marks)

or mcq past sy bhut km thy overall ziada thy..or conceptual b thy..mgr ziada tough nhi thy.

my today's paper

1: if we do chng in line a and b will must chng , wht the relation is it??

2: keeping Connie's case in in mind two question or situations were given and we had to answer that

3: suppose u r going to make a hospital's system diagram , wht would be 5 object will u take?? (5)

4: contextual diagram

different entities were given nd we have to tell the relationship between them \

(NOTE) :(PPR WAS MOSTLY HAVING NEW QUESTIONS , ONLY FEW MCQ'S WERE FROM PAST

AND ONE MORE THING PLZ MAKE SURE THAT U HAVE CLEAR CONCEPT ABOUT DIAGRAMS TYPES ...MOSTLY QUERIES WERE RELATED TO THEM. LIKE DATA FLOW , SEQUENCE ETC

Today is my paper

Identify in object , sequence diagram . 2 marks

Diagram di hoi thi.....

Following are the necessary aspects and object should contain in its completeness. 1 state 2 data 3 behavior 3 marks.

In sequence diagram which notations are used for the following 1 Asynchronous messages 2 synchronous message 3 object destruction. 3 marks

The attributes have relationship among them to perform the functionality of the system . identify which types of relationship exist among object? 5 marks .

:suppose u r going to make a hospital's system diagram , wht would be 5 object will u take?? (5)

My today paper is very simple 5 MCQS from past and 15 mcqs are conceptual

Q: Name to two type of structure (2 marks)

Q: Define UML methodology its Helpful True or False if true give the reason? (2 marks)

Q: How Encapsulation helpful in software engineering? (3 marks)

Answer: Encapsulation hides the details of the implementation of an object. Intelligent encapsulation focus design decisions that are likely to change. The ability to change the representation of an object without disturbing any of its clients is the essential benefit of encapsulation.

Q: In OO system it's is possible to increase cohesion and decrease coupling (5 marks)

1: Name to two type of structure?

ans:

Generalization-Specialization (Gen-Spec) and whole-part.

2:For an item which attributes can be written?

ans:

The criteria for the inclusion of an attribute is that it should be included if the system needs to know its value and it cannot get it any other way. Don not add an attribute for an association or aggregation. Examples of attributes are: number, name, address, date, time, operational state, phone, status, threshold, type, etc.

3:Architectural design process consists of three activities. List them.

ans:

- System structuring
- Control modelling
- Modular decomposition

my today paper was tough 3 or 4 mcq,s from past paper

subjective bi almost new thi

1st question uml ki use case sequence case or class diagram ko modified karna tha static or dyamic mein

2nd q mein parameter name thay

3rd mein ek condition thi jis mein student pass one smaeter and apply for next samester course us pe sequence diagram bnani thi

moduletiy dive and conquire pe tha question

mcqs were not from past papers all were new

1.assembly line,hanger,plant,sale line etc there examples falls in which category of Peter Coad methodology 2marks

2.what is life line in sequence diagram?2 marks

3.OOD is close to human life.it is less inter dependent.it use generalization and specialization in inheritance.

form above statement what fractures of OO comes to our mind?3 marks

4.Barry Boehm says:

If a project has not achieved a system architecture, including its rationale, the project should not proceed to full-scale system development.explain it.3 marks

5.if u have to specify the requirement of software to a designer. and there is conflict between cost and efficiency in designing the software. in ur point of view which will be better. 5 marks

6.Narrates two examples of Aggregation of real world.5 marks

my today paper

all mcQ's are new

hotel resarvation system mai kitnae object ho sakte hain describe objects 2 marks

which diagram uses in the following functions??? 2 condition thin 2 marks

2 Question Peter Coad methodology se ae thae....Statment di hoe thi r bata tha ak mai objects and dosre mai tangible objects 3, 3 marks

Narrates two examples of Aggregation of real world.5 marks

sequence and collobartion diagrams ke appraches describe karen 5 marks

Q1.. Define Abstraction.

Q2.. ek statement given the jis k mutabik sales k kisi b item ki services nd attributes

likhny thy.

Q3.. late design remain constant in software agreed or not?

Q4...ek scenario tha jis mai tha k software ki cost aur efficiency mai conflict ha,ap isko kesy khatm karain gy?

Q5... ek diagram the jis k relations btana thy.

Q6... ek aggregation nd association se related scenario tha.....

My today's Paper is as under

1. if A and B are two lines of code and if we change the behavior of A, Behavior of B must change what this situation is called? (2 marks)
 2. Sequence Diagram focus mainly on what two things? (2 marks)
 3. In UML "Class" notation has three parts name each part? (3 marks)
 4. Classify the following diagrams as dynamic or static.(3 marks)
 - a) Class diagram
 - b)Sequence diagram
 - c) Use case Diagram
 5. In Abbot's Textual analysis what these terms mean (5 marks)
 - a) Proper noun
 - b) Improper noun
 - c) Being verb
 - d) Having verb
 6. Identify and write any 5 objects of an hospital system? (5 marks)
- This last question is repeated in almost every paper shared here and demands special attention.
MCQ's were not from past papers and 6 or 7 MCQs were from handouts

my today paper 29-6-15

1. peter methodology of V.U identify and explain actor , participant, place and transactin
2. ak seneriotha
k files or folder delete krny k bad recycle bin ma jaty hy but agr hme permentaly del krna ho so wht should we do
peter methodolgy ma batna tha
3. static forecastng is called the
4. static object ks digram ko intertact krte hy (kuch asa he tha)
- 5.object model of hospital.identify
6. object model k 3 points baatna thy

aoa.mera kl cs 504 ka paper ha plz ager in queastions k bari me ksi ko kuch mhlom ha to answer btae plz

- 1 .Identify and write any 5 objects of an hospital system? (5 marks)
2. if A and B are two lines of code and if we change the behavior of A, Behavior of B must change what this situation is called? (2 marks)
- 3 .peter coad methodology
 - If we want to develop object model of a hospital system we need how many classes that will be used in object model of hospital system.
 - If we want to develop object model of a hospital system we need how many classes that will be used in object model of hospital system.
 - 6. Identify and write any 5 objects of an hospital system? (5 marks)

Question No: 1 (Marks: 2)

Define abstraction ?

Question No: 2 (Marks: 2)

Is the design of software architecture a creative process?

Question No: 3 (Marks: 2)

CS504 – Current Paper Questions

Suppose you are working as a software engineer involved in the development of an ecommerce website.

What are the 2 most important characteristics your software must have?

Question No: 4 (Marks: 3)

What is the purpose of collaboration diagrams?

Question No: 5 (Marks: 3)

What is the difference between Aggregation and Association?

Question No: 6 (Marks: 5)

what parameters are used to measure and analyze design quality?

Question No: 7 (Marks: 5)

How the objects are identified in Peter codd's tech

Asalam to all friends!

my paper 16/12/2012

Paper was easy and conceptual.

all Mcqs from handouts & some are tricky.

long & short

Abstraction definition.

Mutual communication explain (3 marks)

how we decrease coupling (2 marks)

whole-part structure is given with relation of association/compositionwe have to explain this why this is whole part structure ... in diagram association relation is given between sale & sale link (5 marks)

simple sa ...easy sa.....munaa saaa code tha ... we have to add cohesion in given code

please please read carefully all notes ... specially last 10 chapters.

see this discussion ...find all questions and prepare these question also .!

MY TODAY PAER

TOTAL 26 QS

20 MCQS 90 % WERE NEW

Q1: as per peter code methodology give an example of "container object" with its two attributes. (2)

Q2:a class comprises how many parts?(2)

Q3:In UML class notation has two parts name them (3)

Q4: Classify Following UML diagram type (3)

Q5:software design phase is a combination of number of activities. list those activities (5)

My CS504 current paper:

Mcq's koch past papers sy thay handouts sy koch thay or 3,4 conceptual thay..

short q's 2 marks

1. aik diargram di v thi jis main sy message btana tha? (sequence dia.)

2. modules k bar main q thawhy a company use this technique?

3 marks:

3. Alia has a fruit basket

es sentence main sy class, object or relationship btani thi..

4. Sequence diagram main sy aik q tha statement di v thi ussy yes no main ans day kar reason btana thi....

Long 5 marks q's...

aik q main scenario given tha usk mutabiq sequence dia bnana thi...

object data modeling k bary main q tha...

overall paper normal thazyada tough nahe tha

conceptual tha

ok

Best of luck

Remember me in your prayers !!

paper was easy

mcqs were not 4rm da past papers bt they were easy

q.1) a simple sequence diagram was given we have 2 identify objects (2 marks)

q.2) names of things were given we have 2 identify which methodology fits?

q.3) find out relationship between different objects i.e father n child

ali n home all like that

q.4) a student claims that store is a container object. Give reason?

bs yai yad the

cs504 today paper 8:30 Am 11 june 2014

mcqz all conceptul not form past papers

subjective qsnz

1.ak statement given thi us m software Artichectr k 2 comonent k lehaz sy explain krna tha

2.Architectural design process k name likhny thy.

3.requirement engnire kasy handl krta h complxty system ki 3 way btny thy

4. message type k name likhny thy

5.object oriented model m hm decomposition krty acording data use krty ya functions

diagram wala qsn ahya hi koi ni yahoo

paper was so easy.

20mcqz 8 from past and other were new but esay

subject was so esay

1. statment given thi btana tha k ye high coupling hai ya high cohenios.

2. statment given thi btana tha k ye functional requirment hai ya non functiona.

3. sequence diagram k notions btany thy.

4. diagram given thi us mein se objects and relationships write down karny thy.

5. ak scenro given tha us ko readout karny k bad information ki examples deni thi.

6. yaad nhi hai.

but overall paper was so easy.

sequence diagram is the most important topic m4-5 mcqs b isi topic se thy.

today was my paper of cs504.

10 mcqs came from moaz file

subject questions were

1. being a requirement engineer whats ur duties?

2. draw lms diagram of aggragaion, associative and inheritance.

3. classify the digram dynamic or static?

4. aik digram given thi wo batana tha whole part structure kaisay hai? (aggragaion point of view)

My Today paper cs504

1. Classify krna tha dynamic and static diagrams k name given the.

2. Classes given thin association ,inheritance and aggregation ka btana tha.

3. Opinion pochha tha sequence and collaboration diagram me se konsi better hai ?

4. Agr kisi object k attribute me aik object declare ho tu kia relationship ho gi?

5. Sequence diagram me destruction of object kis trha represent kiya jata hai ?
 6. Coupling ko kaisy decrease kiya jaye?
-

my cs504 paper

- 1.what parameters are used to measure and analyze design quality?3m
 - 2.identify object and message from given sequence diagram.2m
 - 3.draw sequence diagram.5marks
 - 4.one about object oriented approach 2m
- remaining 2 no remember
-

Today My CS504 paper

Subjective

Identify relationship between?

Father and children	Inheritance
Ali and house	Association
Plants and garden	Association
Human being and parts of body	Composition
Folk music and music category	Aggregation

My today CS504 paper.

40% Mcqs were from past papers.

Association se related ek question tha. 2marks

Difference between place and container. 3marks.

Ek code diya gea tha use cohesion mai convert krna tha. 5marks

Different objects k attributes btany thy. 5marks.

baqi yad nahi sorry yaaaaaaaaaaaaaaaaarzzz :p

Pray for me.

my today paper:

mcqs are almost new

1:a code was given and ask to apply cohesion on code.(5)

2:draw a sequence diagram for criteria and criteria was if a student pass his first sem and now he want to select course for his 2nd sem .a seminar will arrange to decide that whether student is eligible for the course or not.(5)

3:cap is??(2)

a:tangible object

b:not a object

4:UML notations for a class???(3)

5:Notation for asynchronize msg synchronize msg and for destroy??/(3)

Define the term synchronous and asynchronous messages (3)

Synchronous Messages

Synchronous messages are "call events" and are denoted by the full arrow. They represent nested flow of control which is typically implemented as an operation call. In case of a synchronous message, the caller waits for the called routine to complete its operation before moving forward.

Asynchronous messages

Asynchronous messages are "signals," denoted by a half arrow. They do not block the caller. That is, the caller does not wait for the called routine to finish its operation for continuing its own sequence of activities.

Paper was very easy. but my preparation was not well enough. :(
50% MCQs from past papers.

Subjective all new.

1) **Identify the correct statement. (2 Marks)**

- a) 'authorization' is an example of participants
- b) 'authorization' is an example of transaction
- c) 'authorization' is an example of tangible thing
- d) 'authorization' is an example of places

2) **What does a static functionality of the system is called, which gives us the snapshot of the diagram. (2 Marks)**

3) **Why following considered as objects (3Marks)**

- a) Radio
- b) Cat

4) **Classify the following as static or dynamic diagrams (3 Marks)**

- a) Class diagram
- b) Sequence diagram
- c) Interaction diagram

5) **Attributes have functionality among them. Identify which type of functionality is present among the objects. (5 Marks)**

6) **Suppose we are eliciting the requirements of the software and we are facing a conflict between; Cost' and 'Efficiency'. What you will do in this situation. (5 Marks)**

All mcqs were new

Classify the following as static or dynamic diagrams (5 Marks)

- a) Class diagram
- b) Sequence diagram
- c) Interaction diagram
- d) Activity Diagrams

forget other options

How to manage a complex system as a requirement engineer (3marks)

code was given we have to apply Cohesion on it . (5 marks)

client request (with user name and password) server return response. make sequence diagram (3 marks)

Some Questions Have Wrong Answers As Compare to Moaz File

Question No: 2 (Marks: 1) - Please choose one

The state transition diagram

depicts relationships between data objects

depicts functions that transform the data flow

indicates how data are transformed by the system

indicates system reactions to external events

Question No: 3 (Marks: 1) - Please choose one

Control flow diagrams are

needed to model event driven systems.

required for all systems

CS504 – Current Paper Questions

used in place of data flow diagrams
useful for modeling user interfaces
Check Moaz file and compare them
