List down the two ways to simplify the ER Model.

Answer (Please [click here](#) to Add Answer)

Normal Arial 12 B I U

§ Two general methods:
§ De-Normalization
§ Dimensional Modeling (DM)

Made By: Waqar Siddhu

Question No : 22 of 26

Marks: 2 (Budgeted Time 4 Min)

List down any two advantages of applying "change data capture" technique in modern systems.

Answer (Please [click here to Add Answer](#))

Normal Arial 12 B I U

There are no procedural walls, and the data users capture data and retrieve makes the business to grow.

Made By: Waqar Siddhu

Question No : 23 of 26

Marks: 3 (Budgeted Time 6 Min)

"Splitting of single field" is one of the types of transformation. It is used to store individual components of names and addresses in separate fields in data warehouse. In your point of view, what are the benefits doing this?

Answer (Please [click here to Add Answer](#))

Normal Arial 12 B I U

The benefits of doing this is Joining of parts selected from many source systems is more widespread in the data warehouse environment.

Made By: Waqar Siddhu

Question No : 24 of 26

Marks: 3 (Budgeted Time 6 Min)

In your point of view what may be the possible reasons to perform conversion task during data transformation? Explain with an example.

Answer (Please [click here to Add Answer](#))

Normal Arial 12 B I U

This is an all-inclusive task. It includes a large variety of rudimentary conversions of single fields for two primary reasons (i) to standardize among the data extractions from disparate source systems, and (ii) to make the fields usable and understandable to the users.

Question No : 25 of 26

Marks: 5 (Budgeted Time 10 Min)

Identify the given statements as correct or incorrect and justify your answer in either case.

1. "Median is an example of Distributive Aggregate".
2. "With the help of "current value field" method we can track as many changes as we wish".

Answer (Please [click here to Add Answer](#))

1. INCORRECT because...
The holistic aggregates that give a complete picture of the data, such as median.
2. CORRECT.

Made By: Waqar Siddhu

Question No : 26 of 26

Marks: 5 (Budgeted Time 10 Min)

Identify the given statements as correct or incorrect and justify your answer in either case.

1. "When attributes or records are missing in extracted data then the data is semantically dirty".
1. "Pattern-based data cleansing technique identify outlier fields and records using the values of Mean and Standard Deviation".

Answer (Please [click here to Add Answer](#))

- 1: INCORRECT... because when attributes or records are missing in extract data then the data is coverage Anomalies.
- 2: INCORRECT... because Pattern-based: Identify outlier fields and records that do not conform to existing patterns in the data. Combined techniques (partitioning, classification, and clustering) are used to identify patterns that apply to most records.
